

Agricultural Prices - Monthly & Quarterly

Monthly average prices received by farmers for barley, alfalfa hay, all hay, sheep, lambs, and fluid grade, manufacturing grade, and all milk are available for Utah. They are included in the tables that follow. Quarterly prices received for milk cows are also included. Prices received by farmers for other crops and livestock are available only on a calendar or marketing year average and can be found with the individual commodity tables within this publication.

This year we have created a combined average cattle prices for the Cedar City, Salina, Spanish Fork, and Weber Livestock Auctions by month by various classes

and weight groups. These are straight averages of the weekly market reports compiled by the Utah Department of Agriculture and Food's Market News reports. The prices are not weighted by the volume handled by each of the auctions, but should provide a good representation of auction prices in the state. We have data for 1994-1998. Let us know if you find this data useful. Remember, you can access the weekly auction data for Utah and other market reports on the Internet at the Utah Department of Agriculture and Food's home page at <http://www.ag.state.ut.us> and then select "market reports".

Fluid Grade Milk Utah, 1995-98
